

Weather

Emil Ljungdell, Jasmin Hansson

A simple web app that shows live weather for your home city and lets you search, save, and manage a personal list of favorite places.

Screenshots

Key Features

- + Live weather for your home city on open
- + Search any city worldwide and view current conditions
- + Star a place to save it to "My List" (Create)
- + Tap a place for detailed stats: feels-like, humidity, wind, today's high/low (Read)
- + Remove saved places with one click (Delete)
- + Instant °C / °F unit toggle across the whole app
